Professional Summary

Security Engineer & Product-Focused Technologist with cross-functional expertise in Cybersecurity, automation, and full-stack development. Proven track record in penetration testing, Security Engineering, Secure SDLC, Product development and Project leadership. Passionate about integrating AI with security systems to drive innovation. Experienced in managing startup projects, mentoring teams, and aligning technical initiatives with business goals.

Key Skills

- **Cybersecurity:** Pentesting, Vulnerability Management, OWASP, Ethical Hacking, DevSecOps
 - **Engineering & Tools:** Python, C#, Angular, Docker, SonarQube, Snyk, CI/CD, Azure DevOps
 - **Leadership & Strategy:** Product road maps, Program Management, Startup Growth, R&D, Business Development, Product strategist, Market R&D.
 - **Business & Analysis:** Risk Assessment, Business Analysis, Pre-Sales Support, Stakeholder Management
 - **Certifications:** CEH, Ethical Hacking (Udemy), ANZ Forage Workshops, IIT Bombay (Python, C, C++)
-

Target Roles

Product Manager | Cybersecurity Consultant | Security Engineer | Security Automation Engineer
Associate Program Manager | Product Owner | Technical Business Analyst | Innovation Consultant

Hubstream India Pvt Ltd — *Software Engineer (Security & R&D)*

Chennai | Jul 2023 – Present

- Conducted in-depth **penetration testing** and applied security patches across product suite.
- Built an **automated installer tool** for IIS-based deployments.
- Integrated tools like **Snyk** and **SonarQube** into CI/CD pipelines to enhance code quality.
- Delivered **security training sessions** for developers and internal teams.
- Bridged the gap between engineering and security teams for compliance and product improvements.

Achievements:

- Reduced manual effort by 40% through security automation tools.
 - Accelerated release cycles by integrating secure DevOps practices.
-

Startup & Leadership Projects

Digital Forensics & AI Security Startup (Side Project)

2025 – Present

- Prototyped **AI-powered forensic tools** for real-time incident analysis.
- Managed a 3-member founding team and led product design, GTM strategy, and roadmap.

Lead – Trust Null Security Team

2025 – Present

- Built a team focused on **cybersecurity automation** and ethical hacking R&D.
 - Mentored peers on secure coding, social engineering, and defense techniques.
-

Education

B.Tech – Information Technology

BSA Crescent Institute of Science & Technology, Chennai | 2019 – 2023

CGPA: 8.75/10

Certifications & Workshops

- Certified Ethical Hacker (CEH)
 - Ethical Hacking from Scratch – Udemy
 - Cybersecurity Virtual Experience – ANZ (OWASP, Reverse Engineering)
 - Python, C, C++ – IIT Bombay (Spoken Tutorial)
